

In using our system please copy first the folder **“shopping”** to Local Disc (C :) go to wamp then to www and paste the folder. Import the database “cj\_handgunner” to PhpMyAdmin.

### FOR THE USER

The customer must log-in first in order to make transactions. The customer will input the username and password given by the administrator to the qualified members only.

e.g log-in for the user

**Email Add:** [arlene@yahoo.com](mailto:arlene@yahoo.com)

**Password:** zxc

The Customer will proceed to **“Products”** link, under products there is three categories namely Handgun, Shotgun and Ammunitions. After choosing on what categories, customer can now choose a desired item.

After choosing selected products, click the **“Checkout”** in order for the customer to check the list of products being selected. Customer can also change the quantity of a product and the price will also change after clicking the **“Update”**. Customer can also remove an item in clicking **“Delete”**. It also displayed the total costs of the products.

After the checkout, click the **“Proceed to Reservation”** button. Then it will direct to two options, the **“buy”** button and **“Reserve checkbox”**, if the customer will click the **“Buy”** button it will directly bring you to paypal but if you click **“Reserved checkbox”** it will directly reserved the chosen products.

To log-out just click the **“Account”** link above, then choose the **“log-out”** to exit.

### FOR THE ADMINISTRATOR

To enter the administrator page by typing **“localhost/shopping/handgunner-administrator”** at the url.

To manipulate the system you have to log-in first. Input **“cj”** as a username and **“admin”** for the password. After log-in the main form will come out that contains submenus such as Products, Customer, and User.

Under the **“Products”**, the admin can add the products in every category. You can also view all the products and delete it.

To view all the members who are already registered, click the **“Customer”** link. Under of each name is the record of their transactions done. Just click the names and the information of reserved products will display.

For the **“User”** link, the admin can register a new customer who is already qualified by the store.
